Nano9 Premium Supplements

Nano Supplement

Vitamin D3K2

Do your product offerings have near 100% bio-availability? Of course, they don't. Single or low double-digit percentage points of bio-availability is a common issue that has reached a level of general acceptance in your industry.

The Problem

The bio-availability of your **Vitamin D3K2** is no different from your competition. When the end result of **Vitamin D3K2** is the same regardless of who sells it to the customer, you then have to compete on things such as price point or shelf life. In the end, you're not trying to sell a better product, you're trying to sell a better message to the customer in a hope that it resonates with them, giving you a unique strategic advantage.

The Solution

Here is your strategic advantage, a supplement delivery system with near 100% bio-availability for your most common supplements.

Nano9's **proprietary formulas and laboratory processes produce nano-sized pharmaceutical-grade** supplements in suspension. **Vitamin D3K2** the size of one billionth of a meter (100,000 times smaller than the width of a human hair) is such an effective delivery system, that nearly 100 percent of a dose is absorbed instantly.

Supplement Facts

Serving Size: 2 ml (Approx. 8 pumps)
